Photography & Digital Files - £1350

For couples who don't want an album - this package includes everything

else, with photography until after first dance.

*Packages have two prices. The first price includes photography from early in your day until you sit down for your wedding breakfast, whilst the second includes additional photography until after your first dance.

Photography Only - £175 per hour

If a package isn't right for you, I can shoot your wedding on a photography only basis. Just ask me for more info. This coverage includes all high resolution images for you to make your own prints. After your wedding, you can order an album, a collection of prints or hand-finished digital images.

Prints and Parents Albums

Prints can be ordered directly from me or via my online ordering service. A large range of framed photographs and canvas wraps are also available. Prices for parents albums start from £300.
